Work Experience

FloSports

Software Engineer II | Dev Lead

Sep 2022 – Present

flosports.tv

- Leading the full-stack development of user-facing products on the FloSports live sports streaming and content platform using industry-standard web tools such as React, Angular, and Node.js
- Leading and architecting the development of a brand new Backend-for-Frontend framework, built with Nest.js in service of the primary frontend web application
- Architected and developed the frontend of a new pricing infrastructure at FloSports, integrating with Stripe to support new pricing models and revenue streams
- Owned and directed the creation of a new content management system (CMS) utilizing Contentful and React, vastly improving data quality and streamlining content creation processes for internal stakeholders
- Enhances application observability and documentation, and serves as an on-call responder via PagerDuty
- Improved CI/CD pipelines to maximize confidence in the quality of deployed code, utilizing integration tools such as GitHub Actions, Supertest, Jest, Vitest, and Cypress for deployment across development, staging, and production environments
- Conducts interviews and contributes to the onboarding process for new engineering team members
- Organizes and leads monthly gatherings to facilitate group discussion on technical topics, providing guidance on web architecture and supporting the growth and development of team members' domain knowledge
- Plays an active role in bi-weekly Agile ceremonies, significantly contributing to project planning, scoping, and development

Unbridled

Web Developer

Mar 2022 – Sep 2022

unbridled.com

- Developed bespoke web solutions using WordPress and React, tailored to meet the unique needs of each client
- Served as the primary on-call responder and main point of contact for all applications, ensuring timely resolution of client issues
- Fostered client relationships and guided each project lifecycle, from initial planning all the way through design and deployment

Hoamsy

Software Engineer Intern

Sep 2020 – Feb 2021

hoamsy.com

- Iterated on front-end and back-end projects for the Hoamsy apartment and roommate listing service primarily using Vue.js and Google Firebase, enhancing the platform UX for thousands of users
- Collaborated closely with the design team daily to create and implement new features
- Integrated with third-party communication services, enabling native user-to-user text communication within the application
- Restructured the user onboarding process to reduce churn and improved user retention by 30%

Freelance

Web Developer

Sep 2023 – Present

- Independently building custom websites for emerging businesses, providing tailored solutions to meet their unique needs
- Working as a freelance web developer, supporting digital agencies by contributing to web-based projects as a white-label resource
